

ABSTRACT

A combination bassinet, bedside sleeper and changing table apparatus including a supporting frame having a rocking feature convertible through adjustable locking casters for easy rolling. A fabric member comprised of sidewalls and a skirt is draped over the frame. The apparatus may be placed against one side of an adult bed for easy access by a parent. The bedside sleeper is secured to the parents' bed with safety straps. One sidewall may be lowered to facilitate access to an infant by removal of a removably mounted sidewall/skirt supporting rod. The apparatus is adjustable in height to align the bedside sleeper with the parents' bed and when used as a changing table to accommodate for differences in the height of the parent. The bassinet is provided with a removable, adjustable hood for shielding light from the baby's eyes. The apparatus comprises a skeletal structure covered with a soft, aesthetically pleasing and yet sturdy cloth which is easily removable and washable and includes two convenient storage areas.
